Parapet Cap ES-1
Position Statement

Re: IBC CODE, ASCE-7, ANSI-SPRI ES-1, ES-2, ES-3 Parapet Cap

This letter is to clarify that effective immediately, all parapet cap manufactured and installed by Cleburne Sheet Metal will be produced and installed in accordance with ANSI-SPRI ES-1, ES-2, and ES-3.

Furthermore, this may affect the installation details of blocking, masonry, and perimeter walls that are in direct connection to parapet caps.

The following is a list of manufacturing options that will no longer be acceptable in order to comply with ANSI-SPRI ES-1, ES-2, and ES-3.

- All Parapet Blocking will be 3/4" plywood (plywood may be triple stacked, if required)
- No Standing Seam Joinery
- No Cover Plates at Joints (backer plates are acceptable)
- No Slotted Holes on Back Side Parapet Legs

This position paper was written and furnished by Fred A. Couch, Founder and C.E.O. of Cleburne Sheet Metal.

Sincerely,

Fred A. Couch
